SKILL

- CRM & BUSINESS SKILLS
 - CUSTOMER DATABASE MANAGEMENT
 - CUSTOMER JOURNEY MAPPING
 - CUSTOMER SEGMENTATION & PROFILING
 - CUSTOMER ANALYTICS & INSIGHTS
 - BUSINESS INTELLIGENCE (BI) & REPORTING
 - CHANGE MANAGEMENT & TRAINING
 - CROSS-FUNCTIONAL COLLABORATION
- TECHNICAL & IT SKILLS
 - SQL (MYSQL, POSTGRESQL, SQLITE)
 - PYTHON (PANDAS, NUMPY, DATA VISUALIZATION)
 - DATA PIPELINES & INTEGRATION
 - REST APIS & SYSTEM INTEGRATION
 - WEB DEVELOPMENT (HTML, CSS, JAVASCRIPT)
 - CLOUD & CONTAINERIZATION (AWS, DOCKER)

NGHIEM DINH KHANH

CRM Manager

Education & Awards

- Bachelor of Computer Engineering - HCMC University of Technology and Education
- Relevant Courses: Data Structures, IoT Applications, Real-Time Operating Systems
- Top 1 - Google Developer Student Clubs BeCoder (2021)
- Top 1 - Scientific Research, An Giang Province (2018)
- Coach - VEX Robotics National Championship (2024)
- Application Programming Certificate - SaigonTech IT Bootcamp (2018)

Highlighted Projects

- ATM Recycle (Embedded System): Developed classification system using OpenCV - showcased ability to manage complex data pipelines.
- Face Detection (AI): Built image recognition system with Jetson Nano - technical foundation for real-time data analytics.

Work Experience

Oct

-
Present

MindX Technology School

- Programming Teacher
- Trained 100+ students on programming, databases, and data science fundamentals, including SQL and Python.
 - Designed and implemented student management applications using databases - experience relatable to CRM system workflows.
 - Coached diverse groups, demonstrating ability to simplify complex concepts and drive adoption of new systems.

VinFast

- Machine Learning & AI
- Contributed to an advanced AI initiative integrating machine learning, computer vision, and multi-source data systems into next-generation products. This experience is highly transferable to the development of Smart Home System, supporting user experience optimization and service operations.
- Key Responsibilities:
- Built multi-source data pipelines (sensors, images, real-time data) - directly applicable to integrating customer data, IoT systems, and service information
 - Trained and deployed predictive models (SVM, CNNs) for behavior recognition and anomaly detection - adaptable for user behavior analytics, security, and digital experience optimization in customer applications.
 - Integrated Edge AI on embedded and cloud platforms - ensuring scalability, stability, and high performance for applications such as Smart App.

TMA Solutions

Back-End Intern

- Built real-time messaging systems and event-driven applications (Python, ZMQ).
- Contributed to workflow automation and distributed systems – transferable to CRM system integration and enterprise system integration.
- Acquired practical insight into a contractor's mindset and project execution methods, which allows for more effective collaboration and management of external vendors when acting as the client's representative.

Extra-curricular Activities (Volunteer – Support Assistant)

Actively engaged in community initiatives, including:

- Education: Organized workshops, developed curriculum, and tutored underprivileged children.
- Fundraising: Coordinated events, secured donations, and supported community projects.
- Social Support: Volunteered at shelters, assisting the elderly, homeless, and victims of domestic violence.
